

Infinite 3D medium, Isotropic Point Source, Rayleigh Scattering

BesselK0 Random Flight

This is code to accompany the book:

Path Setup

Put a file at `~/hitchhikerpath` with the path to your hitchhiker repo so that these worksheets can find the MC data from the C++ simulations for verification

```
In[ ]:= SetDirectory[Import["~/hitchhikerpath"]]
```

Notation

c - single-scattering albedo

r - radial position coordinate in medium (distance from point source at origin)

$u = \cos \theta$ - direction cosine

Namespace

```
In[2966]:= Begin["inf3DisopointRayleighscatterK0`"]
```

```
Out[2966]= inf3DisopointRayleighscatterK0`
```
